

BACK COMFORT SUPPORT Kayak Gel Seat with **AIR-FLO^{3D}**™ Breathable Fabric

The BACK SUPPORT gel seat helps paddlers maintain good posture and back comfort while paddling. The SKWOOSH™ gel seat relieves pressure on the “sitz” bones while the **AIR-FLO^{3D}**™ breathable fabric promotes natural cooling. The height and shape of this seat is perfect for back comfort and the adjustable lumbar pad allows the paddler to focus support where it’s needed most. Great features like a full sized zippered pocket, a small side zipper pocket and an insulated bottle holder add to the seat’s convenience package.

This is an air-cooled comfort support seat that doesn’t interfere with paddling technique.
